Dear Colleague,

it is a great pleasure to invite you to the second edition of the International Congress **Aortic Surgery "How to do it"**, to be held on December 15th-16th, 2006 at the San Raffaele University Hospital and Research Institute in Milano.

We shall be examining several areas of aortic surgery including the ascending aorta, the aortic arch, the descending aorta, the thoraco-abdominal and abdominal aorta. We shall be looking at the problems stemming from both elective and emergency procedures.

In recent times the advent of endovascular methods has radically modified the approach to numerous aortic pathologies concerning both the abdomen and the thorax. The Congress **Aortic Surgery "How to do it"** will bring together experts from all areas of aortic surgery.

The formula selected for the Congress is that of filmed contributions, allowing the speakers to point out the technical peculiarities of those procedures where they have had the most experience. We take this opportunity to thank each of them for sharing their experiences with us. We hope once again to be able to provide you with a valid opportunity to improve your knowledge.

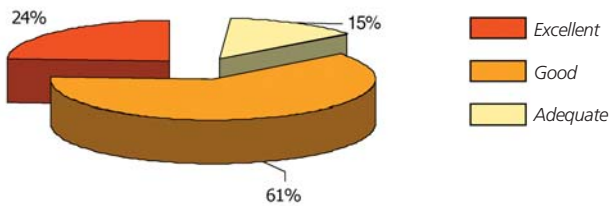

Roberto Chiesa
Ottavio Alfieri

The first edition

The first edition of the Congress Aortic Surgery "How to do it" was held in Milano, on December 17th-18th, 2004.

Thanks to the high scientific level of the lectures and to a stimulating exchange of ideas, the over 1.000 participants who attended the congress, coming from both Europe and overseas, positively evaluated the meeting.
